

Roof Replacement Checklist

Before the start of work please:

- **Remove anything of significant value to you off the walls** until the completion of work. Walls and ceilings will shake during the installation of the roof. We are at the mercy of the construction of the home so we would rather be safe than sorry.
- Please **move anything away from the home prior to our arrival** that you would not like our crew to move. We will absolutely move anything as needed, but some things may be more sensitive than others on the exterior of the home.
- Please **remove cars** from the garage and out of the way in the driveway. We will pull a dumpster in at the start of the project and out at the end of the job. During the installation of the new roof dust and debris can fall and the last thing we would want to do is damage your car or trap your car in the garage with our dumpster.
- Please **be available by phone** if you will not be around during the reroof project, your sales rep and Quality Control Supervisor will work with via phone to keep you up to date with the job or any additional cost that may occur during the reroof process.
- Any **special request** with pets, kids or other concerns that pop up day before we start the job, please reach out, we are more than happy to accommodate.
- Please **mow grass** to a reasonable height and clean up animal waste. This will help with the cleaning of nails and debris. Some debris will fall into the attic from the reroof process. Please cover with plastic to avoid any damage to valuables if any.
- If anything changes in the schedule because of delays in projects or weather you would hear from someone inside our production department. (ALL delays in the schedule bumps the entire schedule back)
